The Grizzly Truth About **Abort**ionist Leroy Carhart

- He is probably the best known late term abortionist in America, yet when he applied for a license to practice medicine in Maryland in September, 2010, Carhart intentionally concealed the true nature of his risky late-term abortion practice from the Maryland Board of Physicians.
- Although the application asks physicians to list chronologically **all of your activities** beginning with the date they completed medical school, Carhart omitted that he had worked at abortion clinics in eight states over the last 20 years including over 10 years at George Tiller's now-closed Women's Health Care Services in Wichita, Kansas, the largest free-standing late-term abortion mill in America.
- While Carhart lists a job history that links him with ten hospitals over the years, his most recent affiliation ended in 1987. He currently has **no hospital privileges anywhere!**
- Carhart's abortions have resulted in numerous emergency hospitalizations and death, including the 2005 third-trimester abortion death of **Christin Gilbert** in Wichita, Kansas.
- Carhart now kills babies at a Germantown, Maryland abortion mill located at 13233 Executive Park Drive. Please join us to protest at that site!
- Vigils are held each Monday from 8 am - 10 am.
