

IN YOUR NEIGHBORHOOD

Do you know your neighbors?

13603 Bardon Road, Phoenix, Maryland 21131

Christian Coles, Ph.D., lives in this beautiful house with his wife, Jennifer E. Coles, M.D. He is an Associate Professor at Johns Hopkins Bloomberg School of Public Health. He does research in the area of diseases and infections to decrease the mortality rate of infants. In other words, he works to **SAVE** the lives of infants.

COMMENDABLE!

Jennifer E. Coles, M.D., an ob/gyn, lives in this beautiful house with her husband, Christian Coles, Ph.D. **She is a CIRCUIT-RIDER ABORTIONIST WITH PLANNED PARENTHOOD.** She travels from city to city (Annapolis, Baltimore, York, PA, Harrisburg, PA) wantonly and callously killing preborn babies, thus increasing the mortality rate of infants. In other words, she works to **END** the lives of infants.

DESPICABLE!

What can YOU do?

WRITE to Jennifer Coles at her home address. Ask her, as an ob/gyn, to **STOP** aborting babies (like the 22-week-old aborted baby in photo) and instead take loving care of both mother and baby!

THE HEIGHT OF HYPOCRISY

A Tale of Two Doctors

Christian Coles, Ph.D., Associate Professor at Johns Hopkins Bloomberg School of Public Health, has done research and published papers on behalf of underserved infants: how diseases and infections increase their mortality rate; **and on behalf of unborn infants**: how underdeveloped weight affects their birth weight and mortality risk.

Dr. Coles' wife, **Jennifer E. Coles**, is a **CIRCUIT-RIDER ABORTIONIST FOR PLANNED PARENTHOOD**. On Wednesdays, she commits abortions in York, PA, where she **kills approximately 15 or more preborn babies**. On Thursdays she aborts **8 to 12 babies** in Harrisburg, PA.

Jennifer Coles walks to the Planned Parenthood facility in York, PA, where she aborts babies like this 6-week-old
